DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 34-51, drawn to a method of delaying, repressing or otherwise reducing the expression of a target gene in an animal cell, classified in class 514, subclass 44.
- II. Claims 52-69, drawn to isolated nucleic acids, classified in class 536, subclass 24.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product could be used in a materially different process. For example, isolated nucleic acids can be used for *in vitro* hybridization assays.

Furthermore, examining invention I together with invention II would impose a serious search burden. In the instant case, prior art searches of methods of reducing expression of a target gene in a cell are not coextensive with prior art searches of isolated nucleic acids comprising first and second RNA sequences. Search of each of these inventions would require different key word searches of each compound and of

each distinctive step of the method using divergent patent and non-patent literature databases. The different searches would then require subsequent in-depth analysis of the unrelated prior art literature, placing a serious burden on the Office in terms of both search and examination. As such, it would be burdensome to perform examination of inventions I and II together.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
